Intune Configuration – As-built as-configured

March 2020

Contents

Overview

Purpose

The purpose of this as-built as-configured (ABAC) document is to detail each Intune Configuration policy and script applied to the solution. These policies and scripts align to the design decisions captured within the associated blueprint document. All settings captured within this ABAC were captured as of the time of writing.

Associated Documentation

The following table lists the documents that were referenced during the creation of this ABAC.

Table 1 Associated Documentation

Name	Version	Date
DTA – Blueprint Solution Overview	March	03/2020
DTA – Platform Design	March	03/2020
DTA – Workstation Design	March	03/2020
DTA – Office 365 Design	March	03/2020
DTA – Office 365 – ABAC	March	03/2020
DTA – Platform – ABAC	March	03/2020
DTA – Intune Security Baselines – ABAC	March	03/2020
DTA – Software Updates – ABAC	March	03/2020
DTA – Intune Applications – ABAC	March	03/2020
DTA – Intune Enrolment – ABAC	March	03/2020
DTA – Conditional Access Policies – ABAC	March	03/2020
DTA – Intune Compliance – ABAC	March	03/2020

Profiles

The following tables list all deployed device configuration policies within the tenant.

Scripts

The following lists all deployed device configuration scripts within the tenant.

Janusseal WOW 64 Configuration

A full copy of the script can be found in *Annex 1*.

Table 28 Janusseal WOW 64 Configuration Details

Script Name	Janusseal WOW 64 Configuration
Platform	Windows
Script Type	PowerShell script
Assigned	Yes

Table 29 Janusseal WOW 64 Configuration Properties

Basics	
Name	Janusseal WOW 64 Configuration
Description	--
Script settings	
PowerShell script	gov.au.2018.1_Janusseal35_WOW6432Node.ps1
Run this script using the logged on credentials	No
Enforce script signature check	No
Run script in 64 bit PowerShell Host	No
Scope tags	
Default	
Assignments	
Included groups	grp-app-Janusseal
Excluded groups	--

Janusseal-35-Configuration

A full copy of the script can be found in Annex 2.

Table 30 Janusseal-35-Configuration Details

Script Name	Janusseal-35-Configuration
Platform	Windows

Script Type	PowerShell script
Assigned	Yes

Table 31 Janusseal-35-Configuration Properties

Basics

Name	Janusseal-35-Configuration
Description	--

Script settings

PowerShell script	gov.au.2018.1_Janusseal35.ps1
Run this script using the logged on credentials	No
Enforce script signature check	No
Run script in 64 bit PowerShell Host	No

Scope tags

Default

Assignments

Included groups	grp-app-Janusseal
Excluded groups	--

MS Defender ATP Registry Recommendations

A full copy of the script can be found in *Annex 3*.

Table 32 Janusseal-35-Configuration Details

Script Name	MS Defender ATP Registry Recommendations
Platform	Windows
Script Type	PowerShell script
Assigned	Yes

Table 33 Janusseal-35-Configuration Properties

Basics

Name	MS Defender ATP Registry Recommendations
Description	--

Script settings

PowerShell script	ATP-Registry.ps1
Run this script using the logged on credentials	No
Enforce script signature check	No
Run script in 64 bit PowerShell Host	No

Scope tags

Default

Assignments

Included groups	grp-Windows-10-Devices grp-SecBaselines
Excluded groups	--

RemoveBuiltInApps

A full copy of the script can be found in *Annex 4.*

Table 34 Janusseal-35-Configuration Details

Script Name	RemoveBuiltInApps
Platform	Windows
Script Type	PowerShell script
Assigned	Yes

Table 35 Janusseal-35-Configuration Properties

Basics

Name	RemoveBuiltInApps
Description	--

Script settings

PowerShell script	Invoke-RemoveBuiltinApps.ps1
Run this script using the logged on credentials	No
Enforce script signature check	No
Run script in 64 bit PowerShell Host	No

Scope tags

Default

Assignments

Annex 3

```powershell
Function Set-Registry
{
    <#
    .SYNOPSIS
    This function gives you the ability to create/change Windows registry keys and values.
If you want to create a value but the key doesn't exist, it will create the key for you.

    .PARAMETER RegKey
    Path of the registry key to create/change

    .PARAMETER RegValue
    Name of the registry value to create/change

    .PARAMETER RegData
    The data of the registry value

    .PARAMETER RegType
    The type of the registry value. Allowed types:
String,DWord,Binary,ExpandString,MultiString,None,QWord,Unknown. If no type is given, the
function will use String as the type.

    .EXAMPLE
    Set-Registry -RegKey HKLM:\SomeKey -RegValue SomeValue -RegData 1111 -RegType DWord
    This will create the key SomeKey in HKLM:\. There it will create a value SomeValue of
the type DWord with the data 1111.

$RegType -Force
            }
```

Annex 4

```powershell
<#
.SYNOPSIS
    Remove built-in apps (modern apps) from Windows 10.

.DESCRIPTION
    This script will remove all built-in apps with a provisioning package that's not
specified in the 'white-list' in this script.
    It supports MDT and ConfigMgr usage, but only for online scenarios, meaning it can't
be executed during the WinPE phase.

    For a more detailed list of applications available in each version of Windows 10,
refer to the documentation here:
    https://docs.microsoft.com/en-us/windows/application-management/apps-in-windows-10

.EXAMPLE
    .\Invoke-RemoveBuiltinApps.ps1

.NOTES
    FileName:    Invoke-RemoveBuiltinApps.ps1
    Author:      Nickolaj Andersen
    Contact:     @NickolajA
    Created:     2019-03-10
    Updated:     2019-10-03

    Version history:
    1.0.0 - (2019-03-10) Initial script updated with help section and a fix for randomly
freezing
    1.1.0 - (2019-05-03) Added support for Windows 10 version 1903 (19H1)
    1.1.1 - (2019-08-13) Removed the part where it was disabling/enabling configuration
for Store updates, as it's not needed
    1.1.2 - (2019-10-03) Removed unnecessary left over functions and updated catch
statements so that they actually log the current app that could not be removed
